

Solutions by Garaventa Lift

Model: Elvoron CPL

Project Name:

Arnold Community Church

Location: Abbotsford, B.C.

Installation Date: 2008

Description:

The Elvoron CPL is a vertical wheelchair lift with a full height cab and a ceiling (non-weight bearing). This gives it the look of an elevator, but with the constant pressure controls of a wheelchair lift.

The hoistway entrance doors are 1-1/2 hour fire rated doors with vision panels. Access through the one exterior door is controlled by a keyed call station at the outdoor landing.
