

Solutions by Garaventa Lift

Model: Genesis Enclosure

Project: Perez Residence

Location: Sterling Heights, MI

Installation Date: 2009

Description:

This lift is a Genesis Enclosure by Garaventa Lift. It solves a typical accessibility issue in a private house without taking up space within the residence.

The lift features clear plexiglass enclosure panels, a steel sloped roof and a thermostatically-controlled ventilation system. The directional controls at the upper landing are conveniently attached to the outside of the enclosure frame. The lift also controls power door openers for ease of entry.
