

# Solutions by Garaventa Lift

**Model:** Genesis Enclosure

**Project:** U.S. Military Academy

**Location:** West Point, New York

**Installation Date:** 2011

## **Description:**

In order to install a wheelchair lift, the owners opted to cut a section out of the front porch. This allows the lift to be anchored back to the patio joist. It also protects the lift and the passengers from rain or snow.

The lift is installed in a shallow pit, allowing for level access at the lower landing.
