

Solutions by Garaventa Lift

Model: Genesis Opal

Project: House of Air

Location: San Francisco, CA

Installation Date: 2010

Description:

This location used two Garaventa Lifts to solve accessibility issues in separate areas. The application on the left is a Genesis Opal.

The lift features a standard sized platform with the popular straight-through on/off configuration. This type of platform configuration is popular because it is very user-friendly and cost-effective.
