

Solutions by Garaventa Lift

Model: Genesis Shaftway

Project: Brooks Brothers

Location: Nashville, Tennessee

Installation Date: 2008

Description:

Brooks Brothers is a popular men's clothing retailer, where appearance and style are emphasized. They chose a customized Garaventa Genesis Shaftway vertical platform lift. The lift was painted in a custom color to match the surrounding woodwork and features lower panels in the doors that have steel kickplates on the inside and cherry veneer on the outside.

All three entrances have power door operators, especially useful at the lowest landing where there is a fixed ramp to provide level access.
