

# Solutions by Garaventa Lift

**Model:** Elvoron Stella

**Project Name:** Showroom Demo

**Location:** Sydney, Australia

**Installation Date:** 2012

## **Description:**

The Stella residential elevator has heavy-duty lifting components and sliding two-speed elevator doors, much like a commercial elevator. The carrying capacity is 1400 lbs (636 kg).

This model is not installed in a normal drywall hoistway. Instead, it features a modular aluminum framed enclosure with panels of clear glass, by Garaventa Lift.

The car also has glass panel walls. The passenger enjoys the view outside of the hoistway while traveling between floors.
