

Solutions by Garaventa Lift

Model: Home Elevator

Project Name: Farren Residence

Location: Northern California

Installation Date: 2013

Description:

This is a hydraulic home elevator which allows passengers to view outside of the elevator hoistway while travelling. The cab and hoistways walls, and the entrance doors all have safety glass vision panels. From outside of the elevator, the mechanical components are visible.

The elevator features a powered accordion cab gate with full length clear acrylic panels. The owners also chose maple veneer walls, brushed aluminum fixtures and a custom remote controller.
