

Solutions by Garaventa Lift

Model: Elvoron LU/LA

Project Name: Cootamunda Ex-Serviceman's & Citizen's Memorial Club

Location: Cootamunda, Australia

Installation Date: 2012

Description:

The inclusion of an Elvoron LU/LA elevator is a perfect way to provide accessibility in buildings with two or three floors.

This elevator has a Style 4 layout, two handrails, stainless steel sliding doors, and a custom secondary car operating panel (C.O.P.), a code requirement in Australia.

The elevator is smartly located near the stairs, allowing stair users and elevator passengers to share the same general path of travel.

For many small to medium sized commercial and public buildings, an Elvoron LU/LA is the right choice.
